Career Objective

Communication and Electronics Engineering student combining **Full-Stack .NET** proficiency with **Embedded Systems** design. Experienced in developing integrated hardware-software solutions. Seeking to leverage this multidisciplinary expertise to build efficient, high-performance engineering systems.

Education

Bachelor in Electronics and Communications Engineering Damanhour University | *Sep 2023 – Present (Expected Graduation: 2028)* with a cumulative **GPA of 3.881** (Distinction).

Projects

CNC Laser Machine | System Designer & Developer

- Engineered a fully functional 3-axis CNC machine, seamlessly integrating mechanical structures with precise stepper motor control algorithms.
- Designed the electronic control unit (PCB) to interface stepper drivers and laser modules, implementing Serial Communication for real-time data transmission.

3-Phase UPS Event Logger & Alarm System | Embedded Systems Engineer

- Designed a safety monitoring system for 3-Phase UPS units using Microcontrollers and Sensors.
- Engineered data logging algorithms to store **100+** power events per hour fluctuations and trigger immediate alarms to prevent equipment damage.

Smart Light Control System | Automation Developer

- Developed an automated energy-efficient lighting system that adjusts based on environmental conditions, reducing electricity consumption by **35%**.

Activity

Spark X Electric Car Team | *Technical Member in dashboard team*

- Participating in the EVER Egypt competition, designing and implementing electric vehicle subsystems and dashboard interface.

Masar Family | *Participant*

- Engaged in university-level workshops focused on technical and soft skills and community development.

Hackathons & Competitions

- **Co-Founder & Team Leader | Reef Plus (Agri-Tech Startup)** Led the development and pitching in multiple hackathons, presenting an innovative **AI & IoT-driven soil monitoring prototype** to investors and industry experts.

Enactus Damanhour | Project Management Member

- Contributed to planning and executing projects, ensuring adherence to timelines and project goals.

Courses and Trainings

Professional Web Development (.NET Full Stack) Digital Egypt Pioneers Initiative (DEPI) | *Ministry of Communications and Information Technology (MCIT) 2025 – Present*

- Developing robust full-stack web applications using .NET and JavaScript frameworks, while adhering to industry best practices to ensure code quality and maintainability.

Entrepreneurship & Startup Fundamentals Creativa Innovation Hub & TIEC *2024*

Skills

Technical Skills

- Software Development: C# .NET, ASP.NET MVC, SQL Server.
- Programming Languages: C++ (OOP & Data Structures), Python.
- Tools: Visual Studio, Git & GitHub.

Soft Skills

- Entrepreneurial Leadership (Startup Co-Founder).
- Team Management, Collaboration & Analytical Problem Solving.
- Research & Continuous Learning.
